Hello All,

I am looking for someone that can make an SRT file off of a 3-D drawing that I have had rendered for a project. It shouldn't take that long because I already have all the dimensions but could definitly use someones expertise so I know that what I am having made will look like this rendering I have. Once I get the project back, I would also like to have some tweaks made up until I go into production. Please let me know if interested. :)

Thank You
Brandon

Hello Brandon, welcome to Shapeways.

You need an STL file right?
From the Shapeways FAQ:
Quote: What file formats does Shapeways accept?
You can upload STL, VRML2/97 (.wrl), COLLADA (.dae), X3D and OBJ files to Shapeways.

I can help you with that. Just PM me your image(s) or email them to me: marcus(at)denali3ddesign.com and we'll go from there.

Regards,
