urgent!

one is a modifcation of a part of a popular toy / gadget . for this job you should promise to secret until we publish it
(hopefully at japan media art festival in feb 2013) thanks for your understanding.
the other job is the help to complete a statue . I need support in the 3d construction drawing in general and especially to
make a detailed plan for the turntable holding arm of the statue you see at : http//:mnm.humatic.de
Additional to your favorite (professional) tools it would be perfect if you would work in sketchup as well.
I cannot pay a lot but I think the jobs can be done relatively easy and fast for somebody with medium to good skills.

thanks in advance
christian
