I came to shapeways reading here (www.shapeways.com/3d_parts_database) that there are FREE downloads. How does one find them?

Under create there is a link for downloadable models. All Shapeways downloads are free.

I think I understand this now: The price listed is not for the download but for the MAKING of the part in a variety of materials?

On the page http://www.shapeways.com/3d_parts_database it seems to imply that you can download from that page. But.. the Login button on that page doesn't work.. it likely needs to be added to the InShape bug list.
