I need a 3D Modeler to help me make: River Irt *old and current*, River Esk, River Mite, and Northern Rock from the Ravenglass & Eskdale Railway :L.

Hi RiverIrt03,

Do you have any drawings & dimensions to go from?
And what kind of size/scale are you looking to have them designed for?

Cheers,
Paul

I can get the dimensions from the Ravenglass & Eskdale Railway site and paste it on here but I got someone else doing Northern Rock and I can't get River Irt's old build dimension though

Hi-

I work with a team of experienced 3d modellers which should be able to help you at very affordable rates.

In order to give you an estimate it would be useful to get some pictures of the locomotives you have in mind and an indication of the material you want to use and size of the models so we can assess the level of detail we can go into.

Feel free to send the details to uvegter@yahoo.co.uk and I wil come back to you as soon as possible.

Look forward to hearing from you.

Cheers,

Uco

Thanks, Uco. I'll add you to my contacts list on Yahoo.com and send you a pic and detail about the scale that I need the locomotives to be :3.
