I have the designs ready and I'd like to get some custom keychains rendered in 3D. I would be using my "U.P. HEART" design which you can view at www.YooperShirts.com for reference. I will send the actual file if you are interested in this project. To get an idea of what type of keychain I would like you can view one here:
http://shop.johnnycupcakes.com/Shop/Details.aspx?ProdID=1627

Please let me know asap!

For sure. Where are you located? Also, what do you charge for something like this? Did you click the link of the keychain I want you to use as reference for the 3D rendering?

Here it is again: http://shop.johnnycupcakes.com/Shop/Details.aspx?ProdID=1627

Thanks!

- Jeremy

You two have almost got me as confused as you both are. Lets get the facts straight.
1. Is an object needing to be modeled similar to the cupcake key fob?
2. Model the link connecting the fob to the ring?
3. Model the ring?
4, all of the above?
5. Any or all once modeled to be ready to print at SW,or,
6. To be rendered for display purposes into a 2D image?
7. I hate to ask, the keyfob to be printed in color if its option 1?

Keith
