Controller Pendant
A father & son project.

Some time last year (2012) my 13 year old son, Nath, was trying to think up ways to make a bit of extra pocket money. Knowing Nath's artistic flair, I suggested a design of something he could have 3D printed. Nath drew up the design on paper, I did the 3D model work and between us we came up with the style of the pendant based on an Xbox games console controller.

Ordered on the 15th December, the pendant arrived on the 2nd January, in plenty of time for his birthday next week.

This is Nath's first design and any markups from this model all go to Nath.

Thanks Duann :)

Nath loves the pendant (and so do I)

Woo! Fantastic job guys :)

The next generation of 3D modellers is here!
