Hi there,
Am looking for a 3d modeller to do my jewellery sketch designs into 3d model print files so I can print via shapeways.
Preferably a 3d modeller whom has done their own 3d printing before with shapeways and not just an 3d illustrator.
Please message me if interested asap.

thanks,
Rani

Am looking for a 3d modeller to turn my Sculptural design into 3d model print files so I can print via shapeways.

Preferably a 3d modeller whom has done their own 3d printing before with shapeways and not just an 3d illustrator.
I only have photos of my image.

Please message me if interested.

Thanks,
Clarence Talley [/quote]

I think I can do this for you. I've been 3d modeling for 2 years now and printing for 4 months, check out my shop to see what I've done and let me know what you think.

I've gotten my design completed and uoploaded to shapeways. I'll keep you in mind for future projects.
