For my mother's birthday my daughter and me created a small personal gift. My daughter drew pictures of her family in the Netherlands (we live in Bolivia), and one of the drawings I adapted into a 3D model. Shapeways printed this in stainless steel, and I believe the result is stunning. Thank you for this brilliant service!

I bet your daughter is struttng now. She is officially an 3D artist, along with her flunky. There are so many possibility's that kids can be involved in for a 3D project for a gift, that will will give them a taste for artistry.

Keith
