I am a student currently and am looking for work. My 3d is amazing and can make models and anything pretty much; I use blender 3d and lightwave. Please get back to me if you have any work or projects I can help.

Hello,

I am looking for someone to do a 3D model of a simple earring photograph that I have ready. I saw your post and I think this could be a good fit. It's a really simple job, but I will give you excellent feedback if you can complete this.

I own a large spray tanning manufacturing company (www.envytan.com), but this is an unrelated side project. That said, we are always developing new products, and we could use a great modeler on our team. Please let me know if you are interested.

Hi,

May I call or email you regarding a design project?

I'm seeking a designer who can work on site in Manhattan for the first project, them remote for other projects.

Projects include:

- novel water bottle concept

- cobra belt buckle

- glasses

- skull mask

Please reply to smugsly1@gmail.com

Thanks,

Evan
