Looking for an experienced 3D modeler to turn my photographs and sketches into 3D format for rapid prototyping. This is a pet product for cats so being familiar with cats is a plus. Would love to start working on this ASAP. I have 7 different designs that need to be done. Thank you!

I could possibly help you. Please send me a message for more information.

Regards,
Bob

If it doesn't work out with SpikManDesign you could always try posting on the 3D Modellers needed forum.
