Hello,

I'm looking to have a simple revolved shape 3D printed, but since I have very little experience with modelling, I was hoping someone could help me here.

I have attached a photo of the shape I need. The blue line is the axis to revolve around, and the black is the profile. The finished shape should be approximately 2" tall.

Would anyone be willing to do this for me?

Thank You,

Hello Drew,

I'd be willing to do this for ya, 2 minute job really.

Do you want this hollowed? (to save cost on printing material)

If so you'll need a drainage hole, let me know what kind material you'd like this printed in and I'll set it up.

Regards,
Eric Lopez

Hi Eric,

Thank you for your offer to do this for me, I appreciate it a lot!

Hollow will be fine. If it's ok, please put the hole about 1/4" up from the bottom.

Fine Detail Plastic, White.

Thank you!

Hi Drew,

Happy to help, I'll send you the file over PM.

Regards,
