Fantastic! As a game maker... currently making a game... are you planning to use these as prototypes or actually print final minis? How do the costs seem these days? (I am assuming the pictured hexagons are 1" or 28mm?

Is it just me, or are those catapults backwards? Haha, But lovely prints though

Yes the catapult are backward, my mistake ^^.

I'm thinking about selling the figurines in almost that state (with one side paint in black of course)

but I'need to find how to make the good packaging. I'll try to contact editors to see if they're interesting and how it works.

Maethius you're right about the dragon size and the price is lower than 12â‚¬ without the shipping cost.

Is that 12â‚¬ for the figure set? I can't imagine they would be that low!

SO, though you are in prototype/beta with the game, how much do you see it selling for?
