Dear All

My name is Mike Hancox and I am a Mechanical Engineer with a First Class Honours Master of Engineering Degree in Mechanical engineering.

I am offering a service for mechanical design of product prototypes, devices, moulds, mechanisms etc etc.

I am keen to build my portfolio of designs so I am offering my services at a very competitive rate.

I have 4 years experience working as an engineer in industry which builds upon my university training to give me over 8 years experience in engineering and engineering design.

Please contact me if you would like to use my services for 3d modelling and or prototype engineering design. I will help you to get your idea in your hands.

Thanks
MikeHancoxDesign
