Subject: Cogito ergo kaboom (I think, therefore mind=blown)

Greetings from Alberta's capital region.

I'm a CAD/CAM engineering technologist by education, a machine designer by occupation, and a lateral thinker by avocation. My design tool of preference is Autodesk Inventor, but I've been doing computer modelling and graphics off and on since the mid-'80s. (POV-ray to start, and on through a few others along the way - predominantly Autodesk products.) I learned of Shapeways via Autodesk Inventor's users' newsgroup, came for a look, and decided to set up a shop. There's no sense in not making a few nickels off of my own creative output. With some ingenuity, some perseverance, and a little luck, I might be able to make enough for a cup of tea now and then.

Come on by for a looksee at www.shapeways.com/shops/Cogitorium and see if anything tickles your fancy.

Welcome! What kind of things are you designing for Shapeways?

Anything other than mobiuses (not sure what the plural for mobius is? Mobii?)?

Coming soon (give a poor newbie a chance) but some things may require a delay to public exposure for patent and/or design registration first.
