Hello Shapeways people, I have the pleasure of introducing myself, VirtualV.
http://www.dotsan.com
I'm based in Glasgow Scotland

I have been modeling for some time and have successfully worked with other international Shapeways members realizing their ideas.

I've been able to resolve members problems with their models, those horrible holes, manifolds and shelling.

I do most of my work in Rhino 3D and have over 10years experience with it, I pride myself on creating any form which is sound enough for any manufacturing process.

If you have any questions or challenges let me have a look.
Cheers
V

I have to ask, is that you in that picture? And I've looked at your site. It's very interesting. Except Dotsan brings to mind a shitty truck that you don't see as much any more polluting our highways .

Ha ha, nah that's not me in the pic, wish it was in a weird way. Yeah I see where you'r coming from regards the name and Datsun, my day used to have one of them, maybe that's where the inspiration came from.
Dot San basically means dot 3.

V
