Hi Shapeways fans,

Snake Ball is a mechanical maze. The object is to separate the two rings. The complexity from this puzzle is that one ring has a little pin that slides in the grooves of the other ring and vice versa. So you will have to solve two mazes simultaneous. The puzzle also has another surprise. When you are at the point that you think you have finally solved the puzzle, you will discover that you are only halfway.

Snake Ball was originally 3D-printed by George Miller, and sold at his Puzzle Palace website. However, with his shop closed down and demand for this puzzle continuing, the puzzle is now for sale at my Shapeways Shop.

Watch the YouTube video.

Buy the puzzle at my Shapeways Shop.

Read more at the Non-Twisty Puzzles Forum.

Check out the photos below.

Enjoy!

Oskar
