I recently posted a new series of models, and announced them on a number of newsgroups, only to discover that overnight they all turned into "No Longer Publicly Available":

Is there someway this can be corrected?

Quite funny though in combination with your shop name
The question is only : when

I eventually found a workaround - go to each model, uncheck the "available to all", save the model, and check the "available to all" and resave. This seems to make things available.
