I did a little instruction and a few photos of the build process:

It's impossible to insert one of center pieces to a hole because of printing error (Shapeways' fault). But you can easily correct this by a sharp knife. You should enlarge the hole a bit and cut end of center piece. Or you can make the hole and the "fist" oval (see photo), it's easier for me to fix the details like that. But be careful with using a knife, you can easily cut more than you need! And then the details won't hold up.

if you understand how to operate the latch, I want to show everybody the way assembly of different puzzles...

about sticker: new adress store - http://speedcubing.hu/webshop/
OlivÃ©r Nagy: rubikkocka@gmail.com & admin@speedcubing.hu
some micro puzzles there:
http://speedcubing.hu/webshop/index.php?main_page=index&cPath=6&zenid=fa32242e5598d3d7fb9adef905ba3e7b
You can ask him to draw sticker sets and for other puzzles

Stickers ill stick to the puzzle. I used dense "Super Glue Gel," I gently inflicted with a needle small drop of glue and stick a Sticker.

Hi All
I redesign part for all my Micro-Cubes. please, see new instruction for assembling this puzzle :)

full parts set

cut all connectors

new core design !!!

assembling center parts - very easy!!!

assembling other parts

assembling last two corners and endge.
please use special cropped corners

all done, congratulation :)
