Hi,

While I was ordering, my shopping cart suddenly broke, I think I busted a wheel or something..
Only shows part of content, no make-up or scripts loaded,
I can't empty it, nor move past it..

Please fix this, I need to order my monthly fix!

Cheers,

Stijn

Edit : windows 7 64-bit firefox 3.6.12, it was fine one minute, broken the next..

Perhaps a server error. I'm having a problem with my models saying they are no longer available.

Yeah, saw that too just now.

Also after I login I'm presented with Batsheba's shop, no matter what page I was on

When I try a different browser/session, I can shop just fine, but as soon as I log in, my shopping cart refuses to move..

Any tricks on how to empty the cart by direct link ?

Ok, filling a shopping cart when logged out, and then logging in, seems to overwrite the stored faulty cart.

So problem solved for now. but I'll retry the order tomorrow.

Cheers.
