Hi guys!

I ran into an article about this site in an old pc magazine while waiting for the dentist...

I collect dice, and some of the things I saw here are amazing.

I have no experience in 3d models but I am a programmer, and I think I'll try to play with openSCAD and the other open sourced friends (running on my gentoo linux machine).

My master plan is to design cool mathematical dice and jewelry, and maybe even sell a couple, so I can afford buying all these dice.

Looking forward to making my first model.

ET

Welcome! I am an openSCAD user as well, pretty much everything in my shop was designed using openSCAD. Go SCADders!

×•×”×œ×Ÿ

Hello & welcome
I used Sketchup for designing all my 150 dies.. go figure
