Hey everyone, I'm new here, stumbled across this site while looking at rapid prototyping services for making models for me to create molds from.

I've already uploaded a few models to get an idea of costs, seems easier than sending them to a company and waiting for them to get back to me.

I've made one available to buy if it's you cup of tea.

I been involved in 3D for a few years and use 3DS Max as my weapon of choice. Mostly I work on Sci-Fi related projects as you may have noticed if you've looked at my models.

I look forward to spending time around here and getting to know everyone when I can.

Hey Dorian,

nice to meet you! Please let us know how the model works out for you.

BTW, I can only see one model in your gallery. Did you intend to share more with us?

Cheers,

Bart

The others were still in the test phase when I introduced myself, one still is. I kinda got side tracked working on my Mech models.

One of the first group I uploaded is now done and is now for sale, along with one of my Mechs, there's two versions as you can see but one of them is a custom job for myself only.

Really excited about ordereing both version of the Mech REALLY soon, but first I need to get my second Mech design finished to cover the three custom units in my strategic ops company. So keep an eye open for my next BattleMech the WRD-4N Warden. Should be finished in a few days tops with any luck only got the arms and shoulder missile packs to do now!
