I have been designing this chess set for the past ten years on and off. It was supposed to be made out of alluminiun tube. Just never got around to it. Now on discovering this great site, my creation will become a reality. I just uploaded my chess set last night but I am a bit confused on how to open a shop, so everyone can share my design.

Hi JACANT

Wlecome to Shapeways.

Your chess set looks cool!

And it looks like you have already figured out how to open your shop, you have a 'Go To My Shop' link on your forum post.

Paul

Thankyou for the welcome.
As for setting up my shop. I got as far as entering my paypal details but got stuck. I already have a pay pal account but I am not sure what details I should put in the boxes. Any help would be appreciated.

Logout, and then click this link, your shop is set up, just your items are marked 'not for sale'.

As for your details, enter what is says you should (sorry I did that a while back, and things have changed since)... anyone else care to chip in and help out?
