Subject: Keywords - we now have keywords!

I've noticed the shop pages now come with added keywords.

Looking at mine I'm guessing they are generated from search queries leading to the page - is this right and can we edit them ?

Tom

That's interesting... the keywords look like they're also taken from the shop category names... I've got some with 'New Releases' keyphrase that are in my New Releases shop category. I just tested, the shop category name is added when the model is added to the shop category.

[edit]
The shop category keyword/phrase links to the shop category, whereas the normal keywords link to the search function.

Very very weird... i have keywords i've used on OLD models which i've deleted months ago..

That means shapeways doesn't REALLY delete our models data but actually archives it.

Another thing I just spotted, the page meta tag for keywords is strangely missing the keywords!

Is there a way that items will be categorized only by what that individual item is categorized for.
