Rubber Blaster iPhone 5 Case

Life can get a bit boring at times, however what do we carry with us more than anything: Our Phone

Here is an iPhone case for when shooting Angry Birds just isn't real enough, using a new and innovative mechanism, this iPhone case cleverly conceals a system for shooting elastic bands for those times that you want to take your anger out on a target, or even better, a workmate. This mechanism is cleverly designed to fold into the case and only add a small 2.25mm extra depth to the iPhone 5 when not in use, however this is completely disproportionate to the amount of fun it will give you! (A LOT!)

Check out this YouTube Video for a computer generated video of the case in action!

I will hopefully make versions with some surface patterns on the case.

What do you think? Would anyone want to buy one?

What do you think?(total votes: 1)

---

I want one now! 0/(0%)

It's alright I suppose... 0/(0%)

Why would someone buy this? It's pointless and stupid! 1/(100%)

You are a GOD! 0/(0%)
