Hi shapeways visitors.
I want to introduce you to my shapeways shop. It has been around for 2-3 weeks now.

www.shapeways.com/shops/Alaskajoe

I mainly make individual cufflinks. Since I am an aerospace (engineering) student, which I wrote in my shop description too I hope, I wanted some Jet engine related cufflinks for myself. Now I have a shop and add a lot of other stuff regularly.
I have cufflinks of
-steaks
-rubiks cubes (I have a collection of different actual rubiks cubes so I am a fan of that hobby as well)
-flat screens
-pison rod

I also have keychains of most objects, especially concerning engineering.

I also started making jewelry for ladies who like to wear fancy things such as
-converse chucks earrings/pendants
-tequilla and salt earrings
-high heels earrings

So maybe I can adress a small group of potential customers with my stuff and feel free to comment on anything,

Leander

(Oh and don't worry about the scale model of the huge compressor I also have there. I needed to check if its printable at all for my prof at university because he is interested in an exhibition model for the course he teaches.)
