hello everyone i just recently buy a model i designed you can see it here:

<http://www.shapeways.com/model/701408/d0cf14f7928249d1402d49c26a1b82aa>

i just want to buy many of them for sell them by myself. i just got some questions: has anyone know some technique to make a good finish in WSF? or in dyed color how to prevent the dye wears off or to get a smooth finish. here is a picture of the 3d printed model
