Hi,

I would like to create a ring that constitutes the name of my girlfriend and I so I could propose to her. However, I do not know how to operate the softwares available.

It would be awesome if one of you experts could help me do that! Thank you!

Actually, I have a design in mind, it is similar to the ring in this url "
http://www.shapeways.com/model/421672/gcd18-open-wire-weddin
g-band.html?li=productBox-search". Instead of the lines in between, I would like to replace them with the character é»ž so that this chinese character randomly links the two circular parts!

Thank you very much!
