This arrived today!!!

Tristand Minimal - This is a minimalistic iPhone case for both the iPhone 4/4s and iPhone 5 with built in stands allowing the iPhone to be stood in one of three different orientations; one in the portrait orientation and two in the landscape orientation, one brilliant for watching videos and the other brilliant for typing.

This version was ordered after an important design modification over previous versions: the stands for the landscape positions now clip securely into place making the stands incredibly stable. You can see the iPhone case and these stands clipping into place in The YouTube Video (I whipped up some backing music using garageband!).
I hope you like the design!!!
