Hello all

I'm currently looking to have some models made
This is not a difficult model to make
I need someone who has designed items to fit Lego figures as to have special parts I'd like to be created

I currently do have 2 other very talented modelers who create other items for me
But I'm looking to have one in particular that does all my figure helmets and armor (armor attachments)

If your interested ill need to see some preexisting models for reference
Models such as this

Thank you
