"When you buy some beef at the butcher's, you know it comes from cattle that once mooed and chewed.

But imagine if this cut of meat, just perfect for your Sunday dinner, had been made from scratch - without slaughtering any animal.

US start-up Modern Meadow believes it can do just that - by making artificial raw meat using a 3D bioprinter."

Read more at - <http://www.bbc.co.uk/news/technology-20972018>

(wouldn't it be easier to use the gloopiness in cows stomachs that convert grass to meat and use a highly modified lawn mower that spits out meat from grass, or is that just a sheep on a rope?)

Paul
