Hello Modelers-for-hire,

I'm looking for an experienced 3D modeler to convert a 2D mascot into a 3D model (which will then be made into a 3D figurine.) The 2D picture is attached (PSD file available if needed). I should add that this mascot is copyrighted, but is free to share and remix -- details here. The end result will not be used commercially or for profit.

The figurine will need to be able to stand upright, so perhaps a platform will be needed but that isn't ideal. Would like to see examples of work done for other miniatures/figurines.

Thank you.
