Hi

Well most my n-scale military models are out of date. My HMMWV are not up armor. No new N-scale military models has been made since Minifigs U.S.A. went out of business. Last modern vehicles I got from them was the new m987 7 ton cargo truck. But that out of date and been replace by FMTV line of trucks. I found 1 fuel hemtt on here and a bushmaster. Any MRAPs, Strykers, USMC Mercedes-Benz G-Wagon 290 Interim Fast Attack Vehicle, MTRV Series of Vehicles, M-1117 Guardian, and favs. I think my train load has not been updated since Desert Storm. LOL.

I included some pictures. Some resources are <http://olive-drab.com/index.php>

But to all you modelers out there. Even civilian vehicles are needed in our scale too. So if you upload something think about us we folks with small trains sets.

I have 45 flat car military train with about 200 of military models that need to be replace or upgrade. If I have that many think the other model rail road guys and Wargamers who play in 1:160 scale or some might say 12mm scale. But I'm all way looking on shapeway for new N-scale models to buy.

Thanks.
