Can anyone convert this file for me so i can up load it?

I tried converting it but i think im doing something wrong. When it uploads to shape ways its less than an inch ??

Please let me know if you can help

My email is

Rudyvillalpando@aol.com

Dear Rudy,

Please have a look at this website:  
[http://help.solidworks.com/2010/English/SolidWorks/sldworks/LegacyHelp/Sldworks/ImpExp/HIDD\\_STL.htm](http://help.solidworks.com/2010/English/SolidWorks/sldworks/LegacyHelp/Sldworks/ImpExp/HIDD_STL.htm)

And check for the "Unit. Select the unit of measure." in your export settings

Hi Rudy

I will try and take care of this for you.

You have posted the .sldasm but left out the subordinate .sldprt files

Unable to locate the file C:\Users\User\Documents\the 737\DIY PROJECT\737\solid work\GRABCAD\OTHERS\iron man arc reactor IV\CopyDesignTemp\ARMIV\_BASE\_BODY.sldprt.

There is an additional .sldprt missing also.

Send the package to jeffopel@ameritech.net and we'll see what we can do

Jeff
