Hi - I'm Todd from Champlin Minnesota. I make tactical gear and have hit a wall in my designs due to lack of ability to create with polymers.

I'm here to find someone who would like to work on prototyping/building components for my designs.

I need to eat a bit of crow here as a few years ago on saw a video on 3D modeling and thought "big deal" well now I get it.

Perhaps my first project should be a small pie with a crow's head sticking out.
