This is my first work in ceramics: "AEROCup". It 'a coffee cup designed thinking of the aviation world. The three feet and the handle are designed as an "airfoil".

I also thought of a plate for two "AEROCups" designed and inspired to a wing section.

Finally I have realized a short video presentation. I hope you enjoy it.

video

AEROCup

Sweet design, what inspired you to create it? Have an aviator back ground?

I have been working for twenty years in aerospace industry as CAD designer...
so my inspiration is taken from something familiar...
