Hi guys,

new to shapeways, but not to 3D printing. Is there any way we can integrate an item on a external site (shopping site) and have it order through shapeways.

Eg. A customer would visit my site, place the order which would go to shapeways for payment processing etc and then ship direct to the customer. The customer wouldn't even know shapeways was involved until they got the package....

Cheers

I don't know how Shapeways Labs product embedding goes, but there's a useful widget that might help here; <http://www.shapeways.com/labs#shapeways-embed>

It might also be helpful to have a look at our API - this might be the solution you seek!

<http://www.shapeways.com/api>
