Hi!

I was looking for some personalised silver cufflinks for a present, and I found this site.

In the cufflink section there's a line reading

'It's up to you to choose a style, a specific material and a finish.'

I guess that choice goes in the first step of the creator, as when you choose a model, you are also choosing the material and finish, but at present, there's no option to make them in silver.

would it be possible to create the cufflinks in silver? are you working on that?

I think that would make them an even greater present

Great site!

Thanks and greetings from Spain!

Hi,

well your timing was very close!  
We launched our silver cufflinks today.

regards,  
Peter

Great!

Maybe I'll be one of the first customers!

Thanks!

EDIT: Just checked the new pages. By the way, check the 'more>>' URL, it's incorrect and leads to a 404 (points to 3d\_silver\_printing). The one in the image works fine (points to 3d\_printing\_silver).

Thanks for reporting that, mediocaballero!

It is fixed now.

Cheers!

Robert

Very cool! Except I never wear cufflinks. It would be nice to have a more common kind of customized jewelry, like a necklace or earrings.
