Need 1st, 2nd and 3rd gen ipad skin with slight augmentations. Cannot fully disclose idea in a public forum. Suffice to say it's simple somewhat ornate modifications to the thin hard skinned snap-on cases.

Ex: <http://www.newegg.com/Product/Product.aspx?Item=N82E16858995> 281

3D models are floating around of all 3 pieces of hardware, which leads me to believe that someone with experience can perform this in a few hours at most.

I even have a prototype that's nearly perfect that I can show you.

Please let me know what your prices would be as an estimate. I understand they are loose estimates depending how picky I am since you cannot directly see the object in question.

I am not in a severe rush, but completion within the next 2 -4 weeks would be preferable.

Thanks!

Joel
