Subject: Maximum bed size and quote possible?

Sorry for what could be two blatantly obvious questions but:

1. What is the maximum dimensions a model can be for it to be printed as a whole?
2. How could I get a quote for a model?

Thanks in advance!

Size depends on material. Check out the intended material page here for the max sizes. Then for a quote, upload your model and you will get an instant price. No quoting necessary, that will be your price.
