Hello

I am interested in making a various diorama sets based around the AVP movies. There are some sets of miniatures out there but the good ones are long out of print so getting as many as would be needed would be too costly as I have not yet begun getting terrain pieces etc.

So I am interested in possibly getting print templates of Alien and predators parts so I can assemble them and vary the figures stances, weapons etc.

I personally was always disappointed that in the comics and movies the aliens ability to take on characteristics of their hosts did not materialize more. I have a host of ideas Id like to potentially get quotes for.

Also there are a host of 3d files from the games available that if someone could tweak enough to make them suitable for 3d printing and my purposes (suitable for different poses) is a possibility as well, rather than working from scratch.
