My most popular items that were shown on the first pages when searching Categories or Keywords are not showing now at all!!!

Example:

DAD'S BEER RING

Are you still seeing this? Not sure if I'm understanding you right, but I just searched for dad's beer ring, and first thing up was your beer ring.

Everything that comes up has bottle and/or opener in the title, looks like it doesn't use key words in the search? Which does seem like that should be included. Add bottle opener into your description and it looks like that should add your item to the inquiry.
