I've been trying to log into the feedback site.
I was already logged into the main site, the feedback site launches a pop-up window for log-in.
Once logged in the homepage is loaded within the pop-up window.
So I headed to the feedback site via the link in 'Contact Us'.
Once there, I am still not logged in.

The above is the same using IE8 and Chrome.

Hello Shapeways,

Has this been fixed already?

I'm experiencing the same problem...impossible to login to feedback.shapeways.com.....(using Firefox 15.0.1 on XP)

Best regards,
Robert

I've re-raised this bug to be fixed. This week we are still fixing remaining issues with co-creators and the xls download, so hopefully this will be fixed the following week.
