Heya!

I wanted to create a case of my first ever published song, but when I press buy, after selecting the part I want, it gets stuck at loading (has been by now for an hour). I've tried both internet explorer and google chrome.

Anyone have a clue of what's wrong?

Hi lewenhaupt,

I'm afraid that we're having some problems with our Creators at the moment. Our developers are aware of the issue but cannot give a solution date yet (we have some other issues that take priority). I'll shoot you a message once they're back online.

Cheers,

Bart

Mind sending me an email?
(email removed)

Cheers!

Will do! I've removed your email address from your post for privacy reasons.

Cheers,

Bart
