urgent!

one is a modification of a part of a popular toy / gadget . for this job you should promise to secret until we publish it  
( hopefully at japan media art festival in feb 2013) thanks for your understanding.  
the other job is the help to complete a statue . I need support in the 3d construction drawing in general and especially to  
make a detailed plan for the turntable holding arm of the statue you see at : <http://mnm.humatic.de>  
Additional to your favorite ( professional) tools it would be perfect if you would work in sketchup as well.  
I cannot pay a lot but I think the jobs can be done relatively easy and fast for somebody with medium to good skills.

thanks in advance  
christian
