Hi all,

I'm in need of someone whom can create 16 caricatures from pictures, and turn them into printable files (.stl) for a Type A Series 1 3D printer.

The series one has a build volume of 9x9x9 inches and can only manage overhangs of up to 45 degrees. Our plan is to build a chess set, so each character will be a figurine.

Experience printing to an FDM machine is a plus, but not a necessity.

Link to some of your work, give a price estimation if you can, and we can take it from there.

Best wishes,

Espen
