Hi,

I'm a fashion design student at the University of Texas. At the end of the semester, we have a fashion show. One of the categories of design is to create a sportswear outfit. I am doing fencing and I need someone to help me create a fencing mask. I either want to do the shape of an animal head or model the mask after some sort of netting that hangs down from hats like hats in the 20's. Could either of these be possible?

I attached an example below of texture and hope to discuss shape

Hi could be a very cool project, I'd be happy to help, I used to fence many years ago. Please send any drawings with dimensions to info@dotsan.com so I can get a better idea of your design. A mesh is possible but the detail depends on the material you want to print in.

Look forward to hearing from you.
