Dear Modeler,

We have developed an APP called infography in andriod market, we would like to make the infographs into 3d.

We need somebody here to quote for infographs in our app.

Please download infography app here: <http://goo.gl/60A5y>

Get back to us if you can provide 3d models for infographs.

These 3d models will be uploaded to shapeways site through api and our android users can print directly from their android phone.

Since this app is just launched we would like to quote resonably , we have over 50 infographs to be designed however we would want to start with 5 infographs for now.

Please quote you price by email to aravindg@evolgence.com

regards

Aravind Prasad G

Director.

Hi Aravind, sounds like an interesting project, to understand your project better can you send and basic samples and what format you would need the models supplied to you to use in your app?

Please send any info and questions to info@dotsan.com.

Regards

Vijay
