Hello all,

My name is Hugo and I am looking for someone who likes to spend a little time to drawing a 3D model of a N-scale (1:160) cold milling machine (asfaltrees). For example:  
[http://www.wirtgen.de/en/produkte/kaltfraesen/w\\_100\\_f/W100F\\_Produktseite.php](http://www.wirtgen.de/en/produkte/kaltfraesen/w_100_f/W100F_Produktseite.php). Here you can find some PDF's with measures of size. I am into modeltrains size N-scale and like to build some street scenery. Who wants to join in?

Best regards  
Hugo Booister

Hi Hugo, sounds like a project right up my street, please send any info and drawings to [info@dotsan.com](mailto:info@dotsan.com), which one is it specifically and which material are you thinking of printing in?  
Regards  
Vijay
