Hi,

I've made a few more whistles. The "eagle whistle" was modeled with "Sculptris" ... really a great tool!

I think the "acorn whistle" is a bit to large. I'll scale it to 90%, guess this will be the size of a real acorn.

Michael

Too large as in compared to real acorns? I've seen ones that large. Wonderful work as always!

The feathers on that eagle printed really well. Good job.

Thanks Glenn! Guess the feathers would look much more detailed in silver. Maybe I give it a try.

I love the eagle! It's really quite beautiful.

So creative as always...love the series idea.

Thought about this yesterday, you might want to try reaching out to scouting with these items.
