A unique ball jointed doll, with a phoenix bird fantasy theme to her That I have designed, modeled, and put together. All parts 3d printed except for some clear beading cord, and a metal figure * hook for the head.

Here's Wiki's Def on Ball jointed dolls:

Quote:A ball-jointed doll is any doll that is articulated with ball and socket joints. In contemporary usage when referring to modern dolls, and particularly when using the acronyms BJD or ABJD, it usually refers to modern Asian ball-jointed dolls.[1] These are cast in polyurethane synthetic resin, a hard, dense plastic, (although more companies are coming out with different casting materials) and the parts strung together with a thick elastic. They are predominantly produced in Japan, South Korea and China. The BJD style has been described as both realistic and influenced by anime.[2][3][4] They commonly range in size from about 60-70 centimetres (24-28 in) for the larger dolls, 40 cm (16 in) for the mini dolls, and all the way down to 10 cm (4 in) or so for the tiniest of the tiny BJDs. BJDs are primarily intended for adult collectors and customizers. They are made to be easy to customize, by painting, changing the eyes and wig, and so forth.

The modern BJD market began with Volks line of Super Dollfie in 1999. Super Dollfie and Dollfie are registered trademarks but are sometimes erroneously used as generic blanket terms to refer to all Asian BJDs regardless of manufacturer.
